Projects

Drosat – Using Vue: It is a platform that provides online private education in which students participate with teachers, the students' level is evaluated, exams are given to them through AI services, and the results are sent to parents.

Link: <https://drosat.com/>

Germany-CRM – Using Vue : It's the new professional website to Ai Tech company

Link: <https://aitech.net.au/>

Kuttab – Using Vue : It is a platform for memorizing the Holy Qur'an, displaying recitations, and following up on teachers' accounts

Link: <https://kuttab.online/>

Amazon – Using React : It is an imitation of Amazon with all its features, but it is uploaded to the JSON server, so it takes time to download, and work is underway to add Express - Mongo to it.

Link: <https://amazon-clone-frontend-frw6.onrender.com/> HYPERLINK "https://amazon-clone-frontend-frw6.onrender.com/" HYPERLINK "https://amazon-clone-frontend-frw6.onrender.com"

Stamena gym – Using React : It is a fully gym application sell and subscribe and follow and buy within it but for reasons have been rebuilt with json server without backend

Link: <https://dashboard-gym-frontend.onrender.com/>

Tawasal – Using NextJs : it's the first step for building an arabic social media app But it is under preparation now

Link: <https://twasal.vercel.app/>

Brand ecommerce – Using NextTs : it's a fully ecommerce like amazon but different design and features and The next version is being made in mongodb to solve the problem of slow data coming from the json server { in error case refresh until mongo being ready }
